The content of this material is intended to advanced students of Spanish in the acquisition of language skills. It covers the structures used in very popular Spanish songs, which represent the composers and singers who made their songs famous not only for quality and richness of the melody, but also for the beauty of their text and message. Based on such wonderful poetic and linguistic source I was able to create teaching materials to help advanced students in the practice of the Spanish. The use of the live Spanish language from the songs compiled in this booklet allowed me to find the most useful structures of the language that best apply to second language acquisition for those skills needed in the every-day communication.
